

Individual dots represent the average student response for each affiliate faculty member teaching in one or more didactic PharmD, Masters and graduate courses at the School of Pharmacy during the Spring 2016 courses for the question, "This instructor taught the material in a way that was conducive to learning". The red bar labelled "AVERAGE" represents the overall average for all instructors teaching in the same semester. The grey shaded area represents an error bar of ±5% based on the mean.

The table below represents the number of Likert-scale responses for each course in which you taught. It is the basis for calculation of the dots and red line shown above. **Key:** SA=Strongly Agree (4), A=Agree (3), D=Disagree (2), SD=Strongly Disagree (1), UC=Unable to Comment (ignored in calculation). **Total**=total student responses to this question. **Your Avg**=your average in this course, for the instructor question on a 4-point Likert-scale. **Course Avg**=the average for all faculty teaching in this course, for the instructor question on a 4-point Likert-scale.

Refer to the graph above to locate your Overall Average on the curve; note the graph does not reflect course averages.

Name	Course	SA	A	D	SD	UC	Total	Your AVG	Course AVG
Lockman, Keshelle	PHAR 5002	75	33	1	0	7	116	3.68	3.40
Lockman, Keshelle	PHAR 5018	25	24	2	2	9	62	3.36	3.30
Lockman, Keshelle	PHAR 566	18	27	0	0	37	82	3.40	3.36
Lockman, Keshelle Total	Overall	118	84	3	2	53	260	3.54	

**Comments for this Instructor:**

PHAR 5002	Absolutely loved Dr. Lockman, it is because of her modules that the pain module went so well!
PHAR 5002	All those handouts were really helpful. Also annotated SOAP notes was really helpful. Thanks for all hard work for us.
PHAR 5002	Amazing job!! The monographs were amazing study tools that will be useful in the future. You were an amazing teacher and everything I have learned will be useful in the future.
PHAR 5002	Awesome professor! You and Dr. McPherson make a great team! Everything in the pain module was extremely helpful and taught in a great way.
PHAR 5002	-AWESOME, please give this woman a raise, make every class in the school like a mini version of this and we are on our way to #1 in no time. - butttt, I feel we could have streamlined things to move along quicker. -please post keys -organize the BB -always record -give us less of a lecture load so we can manage slowly to get caught up, for ex. take wangs lectures out, they did not help at all
PHAR 5002	Dr. Lockman did great job in creating infographic, powerpoint slides with cartoon figures, and review session for pain medicine calculation.
PHAR 5002	Dr. Lockman is an actual guardian angel. I cannot seriously stress enough how important and valuable Dr. Lockman is as a professor to the pharmacy school. The most important thing about Dr. Lockman is that she cares. Compassion is such a rare and valuable trait in professors these days and I am always grateful when I encounter someone who cares the way Dr. Lockman does. She went way out of her way to provide

	resources for students to learn. From providing drug "characters" with personalities and stories which she had her daughter illustrate to posting comprehensive/exhaustive PDFs to ensure the overall understanding of a topic, Dr. Lockman cares. I'm not sure in which ways Dr. Lockman and Dr. McPherson collaborated on the drug stories and all of the other resources but they both deserve a round of applause. And a raise. I've seen Dr. Lockman's involvement around the campus and community (as a panel member for IPE day for example) and I know that her efforts do not end with the pain module. I can only hope for another course involving Dr. Lockman. Thank you Dr. Lockman, seriously. For everything you did for us.
PHAR 5002	Dr. Lockman is an excellent instructor who genuinely wants students to learn and actually retain the information learned in lectures. She goes above and beyond her role to help students by creating modules, offering alternatives to mediasite by recording live lectures on evernote, and being as adaptive as possible to suit her students needs. She will be an excellent professor.
PHAR 5002	Dr. Lockman made AMAZING info graphics that were extremely helpful when studying for the exam and are tools I plan on keeping handy for the entirety of my pharmacy career.
PHAR 5002	Dr. Lockman was amazing!!! She created infographics conducive to my learning. She also recorded active learning sessions and posted them to help us recall what was said. She would also give Kahoot quizzes at the start of classes to test what we learned last class, which was helpful to recall what we learned. She also volunteered to give an extra review session. She was an all star! Thank you!
PHAR 5002	Dr. Lockman was an amazing educator and whatever institution she ends up going to after her residency/fellowship is over will be more than lucky to be graced with her passionate presence.
PHAR 5002	Dr. Lockman was one of the most caring professors I believe that we have had. She took a direct personal interest in our comprehension of the pain unit. I felt that she was actively trying to solve all student concerns and was excited about her material, which made me excited to learn about it as well.
PHAR 5002	Dr. Lockman was the most helpful instructor. She was passionate about making us successful in this course.
PHAR 5002	Dr. Lockman's infographics and interactive learning sessions (quizzes on therapeutic drugs prior to case discussion) were extremely helpful because it presented the material in a visual way that was easy to understand, and the quizzes were a good way for us to assess our knowledge up to that point.
PHAR 5002	Extremely dedicated. I have really enjoyed
PHAR 5002	great job in pain module
PHAR 5002	great!
PHAR 5002	Her infographics for the pain module were invaluable. She also led a somewhat spontaneous review session for us before the pain OSCE, which was also extremely helpful with calculations.
PHAR 5002	I enjoyed the pain modules the most out of AST1 and 2. The tools that Dr. Lockman and McPhearson used in pain modules helped the most in learning topics. Especially, combination of online/mini-lectures, followed by case discussion with utilization of online-poll system to invoke or reinforce the knowledge was very beneficial. OSCE was also very helpful in applying clinical concepts to real situation.
PHAR 5002	I feel that she genuinely wanted us to learn and I appreciated her going above and beyond to get us the review session and help. I truly learned a lot from this module because of her.
PHAR 5002	I really appreciated all the effort and dedication that you put into this course and into your students. Thank you so much for ensuring that the pain module both enjoyable and informative.
PHAR 5002	I really appreciated that the case keys were posted on BB after class. The many infographics posted were also helpful.
PHAR 5002	I really enjoyed and thought the interactive sessions were really helpful. It gave me more sense of what I didn't know and what i should know. That helped me study and learn more.
PHAR 5002	It was great. Loved the additional study guides. I didn't know if I missed it, but having an additional one which outlined which drug was short acting vs. long acting would have been nice. Maybe I missed it, but just a further emphasis on it would have been helpful when understanding the information for the module. Keep the calculations review, but maybe have an additional pre-recorded where you work through the problem because sometimes it was difficult to remember everything that was said.
PHAR 5002	More professors should teach using the wide variety of learning methods she employed.
PHAR 5002	PAIN MODULE WAS AWESOME!
PHAR 5002	She went extra mile to see that we did well. She made her self available to answer our questions.
PHAR 5002	She's pretty good
PHAR 5002	The modules she made were very helpful
PHAR 5002	The pain workshops were very helpful however, the pace in class was too fast and most time hard to keep up.
PHAR 5002	There were a lot of helpful handouts, I just wish it was organized on blackboard better. Also, I wished to see my SOAP notes from the OSCE but we were never told a time we could come in and review it.

PHAR 5002	Very good partnering with Dr. McPherson
PHAR 5002	Very good teacher and learned a lot from her
PHAR 5002	You all are insane if you let Dr. Lockman go anywhere after she finishes her residency/fellowship/reinventing how to teach AST. What ever you need to do to keep her it's worth it.
PHAR 5018	Dr. Lockman provided a refreshing approach to understanding and memorizing drug-drug interactions. She possesses amazing presentation skills and was able to connect with the students in a way that facilitated our understanding.
PHAR 5018	Her lecture was one of the most helpful during the NAPLEX review session. She provided just enough material for the NAPLEX and her presentation was very organized and easy to follow. I appreciated that she shared some helpful mneumonics with us.
PHAR 5018	She had never taught us before this lecture. But I really enjoyed the lecture. The slides were very clear and they were very well delivered.
PHAR 5018	The best!
PHAR 566	She is really good in teaching. It was said she could not be here to teach.
PHAR 566	Substituted
